## **The Intec Group Signs Contract for Services with Offshore Group Company**

TUCSON, AZ, May 18, 2010 -- The Palatine, Illinois-based Intec Group has recently signed a contract for services that has made International Logistic Solutions (ILS) Intec's exclusive freight forwarder. ILS will coordinate the transportation of all of Intec's ground, rail and air shipments between its Chicago area, Mexico and China production facilities.

In addition to providing Intec with freight forwarding services, International Logistic Solutions cross docks, warehouses and stores materials and finished goods for its client.

According to Steve Perlman, the co-CEO of Intec, "Our choice of ILS as one of our key service suppliers was predicated on its demonstrated competence, reliability and the comprehensive nature of its service offerings. Doing business with ILS enables us to reduce our supplier base, and, therefore, lower overall associated costs."

The Intec Group is a leading supplier to the automotive industry, and is an industry expert in designing and manufacturing precision insert molded and injection molded thermoplastic parts. The company creates manufacturing solutions that increase productivity for its customers.

The ILS Company is an Offshore Group Company. Since 1986, The Offshore Group has provided world-class outsourced support services to top manufacturers in Mexico. As a member of the Group, ILS offers a complete cross border supply chain management (SCM) solution.
