

FOR IMMEDIATE RELEASE
September 27, 2007

Ellijay, Georgia – Whitepath Fabtech, a leading supplier to the heating and cooling equipment industry, has announced that it will open a Mexican production facility in order to supply its major customer, the Carrier Corporation, with control panels for HVAC systems.

Whitepath has contracted with The Offshore Group of Tucson, Arizona for the provision of shelter services in a 35,000 square foot building that will be constructed in Ramos Arizpe, Coahuila. At the project's maturity, Whitepath will employ approximately 75 workers.

According to the company's Vice President of Operations, Randy Huntsman, "Please insert a quote. This is usually where people explain the benefits that they expect to derive from operating in Mexico, as well as why The Offshore Group was chosen to provide shelter services".

Whitepath Fabtech was founded in 1989. In addition to electronic control panels for HVAC applications, the company also manufactures discrete wires, wiring harnesses, and control boxes for heating and cooling applications.

The Offshore Group is the largest provider of "outsourced manufacturing support," or "shelter" services in Mexico.
